Hello {{ contact.FIRSTNAME }},

This edition of the newsletter brings you the latest product announcements and news from iWave. We hope you enjoy exploring the latest in embedded solutions.

iWave is an embedded systems company specializing in the development of embedded computing platforms and solutions. Through an extensive portfolio of System on Modules, ODM Solutions, and design services expertise, iWave aims to be the preferred embedded technology partner across the globe. Building on our core competitive expertise of hardware design, firmware, mechanical and solution design, iWave enables companies in product development in the industrial, automotive, and medical vertical markets.

Latest Products from iWave

iW-RainboW-G50M: i.MX 91 OSM SoM

G50M SoM incorporates the **newest member** of the i.MX 9 applications processor series and is built on the **OSM v1.1** solderable SoM standard.

Read More

iW-RainboW-G53M: RZ/G2UL, RZ/A3UL, RZ/Five SoM

G53M SoM is compatible with Renesas G2UL, A3UL, and Five MPUs and supports features like **Gigabit Ethernet, CAN, USB 2.0, Camera**, and **Display** interface.

Read More

iW-RainboW-G55M: TI AM62Ax SoM

G55M SoM integrates the **C7xV-256** Deep Learning Accelerator along with peripherals like **Gigabit Ethernet (RGMII), USB 2.0, and CAN-FD.**

Read More

iW-RainboW-G42M: AMD Zynq RFSoC SoM

The System on Module features the AMD Zynq UltraScale+ RFSoC Gen3 with the industry's highest RF channel count of **16 Channel RF-ADC & 16 Channel RF-DAC.**

Read More

iW-RainboW-G43M: Intel Agilex 7 SoM

The SoM supports two variants of Agilex 7 FPGA SoC devices, the Agilex 7 F-Series and Agilex 7 I-Series. It features **64 FGT & 8 FHT** Transceiver Channels.

Read More

iW-RainboW-G26I: Rugged Telematics Device

The Rugged Telematics Device is **IP67** rated, supports **3 CAN** Ports and is built for heavy-duty telematics applications in **harsh operating conditions**.

Events

Join iWave at FPGA Conference, 4 – 6 July, Munich

Register now for FPGA Conference Europe and join us in Munich from 4 – 6 July. At our **Booth-28**, you will find exciting live demonstrations and a wide range of embedded computing platforms.

Sign Up Now

iWave: Your ODM Design & Solutions Partner

Industrial IoT Gateways

The Industrial IoT gateway is a compact and robust device that allows seamless connectivity and **data exchange** between sensors and the cloud.
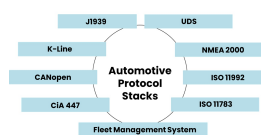

Learn More

Rugged HMI Solutions

Powered by i.MX 8M Mini application processor, the rugged HMI solution delivers an unrivaled user experience and is available in **7", 10.1",** and **12.1"** variants.

Learn More

Automotive Protocol Stacks

Industry-proven & reliable protocol stacks for embedded automotive solutions. The stack is **fully customizable** as per customer's requirement.

Learn More

Embedded Computing Design Partner

iWave provides comprehensive engineering design services involving Embedded **Hardware, FPGA, and Software** development. iWave offers a wide range of services, including carrier board and custom hardware development with manufacturing & certification services, RTL design, and integration of IP cores.
